## **CEOdata cheatsheet**

Xavier Fernández-i-Marín May 17, 2023

## 1 Get survey data

## 2 Meta-data: get and inspect surveys

```
All available CEO studies
CEOmeta()

Meta-data for a specific study
CEOmeta(reo = "746")

Search within metadata
CEOmeta(search = "Medi Ambient")

Temporal restriction
CEOmeta(date_start = "2019-01-01", date_end = "2019-12-31")

Open a browser with the CEO website
CEOmeta(reo = "746", browse = TRUE)

Studies with microdata available
CEOmeta() |>
filter(microdata_available)
```

## 3 Variable labels and values

```
CEOsearch()

Get variable labels
CEOsearch(d)

Get value labels
CEOsearch(d, where = "values")

Search for specific keywords within variable labels
CEOsearch(d, keyword = "Edat")

Translate to English
CEOsearch(d, keyword = "Edat", translate = TRUE)
```
